Add to List

Why change?

- Current software and hardware infrastructure is no longer supported
- Change in product ownership (Oracle)
- Opportunity to use new open source discovery tools in the academic library community

Project goals

- Replace existing Libraries catalog software infrastructure with open source tools (Solr + Blacklight)
- Continue to maintain a central index to support search across both the NC State and larger TRLN collections
- Experiment with developing shared software collaboratively across the TRLN libraries

What changes should I expect to see?

global deforestation - ArgoNCS

FEEDBACK

Looking ahead

- Working toward public release of new catalog interface by the start of spring semester.
- Press release available to the community by mid-December.
